UserBin LLC

Owner

Mar 2019 - Present | Mission Viejo, California

- Solo-preneur delivering top-tier web, mobile, and software solutions to clients far and wide.
- A one-man army turning caffeine-fueled nights into high-performance, stunning websites.
- Pioneered custom, user-centric solutions for names like IBM, Commvault, and Samsung, taking their digital experiences to new heights.

SignNow

Director, Software Engineering

Oct 2017 - June 2019 | Orange County, California

- Managed software engineering teams to align SignNow with customer needs, ensuring the future of our e-signature platform.
- Optimized our development workflow and implemented a streamlined SCRUM agile methodology, resolving communication issues and time constraints to enhance SignNow's product quality.
- Collaborated with Sales to drive new business growth and maintain customer satisfaction.
- Reduced costs by internalizing third-party services, lowering overhead expenses.
- Boosted SignNow's revenue by expanding the Integrations team, offering custom development services, resulting in increased deal closures each month.

Barracuda Networks

Senior Software Developer & Integration Guru

Mar 2017 - Oct 2017 | Newport Beach, California

- Developed NetSuite integration, enabling users to create, review, track, and send documents for e-signature directly within NetSuite.
- Built Zapier integration, providing users with the capability to connect our app with various other apps such as InfusionSoft, Podio, Zoho, Salesforce, and more.
- Created an Office 365 Word integration, allowing users to easily create or add fields to existing documents within Microsoft Word.

VSCode & Visual Studio

Adobe Xd

Photoshop

After Effects, Premier Pro

PreSonus StudioOne

Blender

- Designed a Windows Printer Driver in .NET C#, allowing users to print documents directly to their SignNow account and send them out for invites.
- Implemented a Windows Context Menu in .NET C#, enabling users to upload and invite for any supported document by simply right-clicking it and sending it to SignNow.
- Built a Mac OS X app/extension in Swift, enabling users to conveniently access their documents and send any supported file type to SignNow.
- Integrated with SharePoint, Google Drive, Google Chrome, Egnyte, and other SaaS-based solutions.
- Served as the Lead for the Integrations Team of three members.

SpotSync LLC

CEO & Chief Innovator

Mar 2013 - Dec 2016

- Founded Spotsync.
- Designed and developed Checkout, a Point of Sale SaaS solution, utilizing Node.js, MongoDB, AngularJS, Node WebKit, and various HTML5 technologies.
- Set up and maintained Ubuntu servers on Rackspace Cloud for both development and production environments. Utilized Grunt to automate deployments.
- Designed and developed the marketing website.
- Integrated with various technologies and APIs including Facebook, Yelp, Stripe, Socket.io (web sockets), WebSQL, IndexedDB, SendGrid, and Phaxio.

RES.NET

Senior UI/UX / Web Developer

Dec 2010 - Feb 2013

- Redesigned and implemented a new UI/UX for the flagship SaaS "REO".
- Revamped the UI/UX and implemented changes for the SaaS "Agent".
- Maintained the front-end for all of their SaaS solutions.

Kofax

Webmaster

Dec 2006 - Dec 2010

- Redesigned and maintain the corporate website.
- Managed and set up audio/visual (A/V) for large conventions and events.
- Produced videos for marketing, training, and sales purposes.
- Set up and managed 7+ servers in-house and on Terramark Cloud.
- Developed a custom event management application using Adobe Flex and ActionScript

In2Visions

Independent Contractor & Digital Artisan

Nov 2004 - Nov 2007

- Launched a solo venture to serve up a cocktail of digital media, graphic design, and software development with a twist of creative flair. This was back in the Adobe Flash days, I miss Flash.

COMCASH

Webmaster

Dec 1999 - Dec 2006

- Redesigned, developed and maintained the corporate website for COMCASH, Dr.Billings and Liquor Monitor.
- Provided online solutions for the support staff, accelerating troubleshooting time.
- Developed online applications to streamline the sales process by automating tasks.
- Conducted research, updates, and management of SEO and PPC campaigns, resulting in increased website traffic.
